# Top Tips for Safe Health Care

What you need to know for yourself, your family or someone you care for.

## 1 Ask questions

You have the right to ask questions about your care.

## 2 Find good information

Not all information is reliable. Ask your doctor for guidance.

## 3 Understand the risks and benefits

Find out about your tests and treatments before they happen.

## 4 List all your medicines

Ask your doctor or pharmacist if you need more information about the medicines you are taking.

## 5 Confirm details of your operation beforehand

Ask to be told who will be doing your procedure and what will happen to you.

## 6 Ask about your care after leaving hospital

Ask for a written outline of your treatment and what should happen after you get home.

## 7 Know your rights

You have a number of rights as a patient. Read our guide to find out what they are.

## 8 Understand privacy

Your medical information is confidential. You can ask to see your medical record.

## 9 Give feedback

Feedback helps health professionals spot when improvements can be made.

# Welcome to Mount Hospital

Mount Hospital wishes to extend a very warm welcome to you and your family. At Mount Hospital, we aim to provide an excellent standard of service and assure you that we are all here to help make your stay as pleasant and comfortable as possible.

In the pages that follow, we outline information relating to the hospital's facilities and services, to ensure you take full advantage of the caring environment we are committed to providing for our patients.

Your comfort and peace of mind are important to us because we know that they assist in the recovery process. Please feel free to discuss your feelings and concerns with staff on your ward.

We wish you a comfortable stay and a speedy return to health, and hope that the information contained in this guide will be helpful to you and your family and friends.

## **About Us**

Mount Hospital is a leading private hospital and has been providing healthcare services to the Western Australian community for more than 30 years.

The hospital has 224 beds for overnight, multi-day and same-day procedures, and provides a comprehensive range of services across most adult specialties.

The hospital is fully accredited by the Australian Council on Healthcare Standards (ACHS) – a national accreditation body that ensures hospitals provide the highest standards of service. Mount Hospital is owned and operated by Healthscope Operations Limited, one of Australia's largest private healthcare operators.

# Information for Visitors

## Accommodation for Relatives

There are several accommodation options available within walking distance of the hospital including:

- Quest Mounts Bay Road, approximately 250 meters to the east. Ph: 9480 8100.

## Refreshments for Visitors

Hudsons Café, located on the ground floor, is open seven days a week for patients, visitors and staff. They serve a variety of coffee, tea and cold drinks, as well as hot and cold meals.

Self-service vending machines containing snack food and soft drink are available 24 hours a day, seven days a week at various locations across the hospital. There are also self-service tea/coffee making facilities available – please ask the staff for locations.

## Visiting Hours

Visiting hours are from 3.00pm to 8.00pm daily.

The patient rest period is between 1:30pm and 3.00pm. It is important that visitors observe these times to enable patients to rest.

Visits outside of these hours will be at the discretion of the nursing staff.

## Parking & Transport

Ample paid parking is available close to the main entrance of the hospital and is accessible from Mounts Bay Road.

A patient drop-off and pick-up zone is available at the main entrance. Parking in this zone is restricted to five minutes.

If you require longer than the limit, please use the main car park.

Mount Hospital is situated within the CBD free transit zone and is easily accessible by public transport.

## Taxi Butler System

Located on the front reception desk. Simply press the button once to order a standard Taxi – the device will then advise of the allocated Taxi number and estimated time of arrival. If you require a Maxi Taxi (greater than 4 people) or wheelchair accessible taxi, these requests require a phone call 13 13 30. Our Cabspot number is 1011 this will automatically update the address for ordering of the taxi.

## Patient Finder

Patient Finder is a quick and easy way to provide your family and friends with information about your location during your hospital stay. It is designed mainly to assist friends and relatives of patients undergoing surgery. It will allow them to track your progress through theatre, recovery and your return to the ward. The ward, room number and in some cases, the phone extension number in your room are included in the displayed information. If you change wards and rooms during your hospital stay, Patient Finder will display your updated location.

Shortly after you are admitted to hospital, an SMS message will be sent to the mobile phone number held in your hospital record. Forward this message onto family and friends. This message contains a web link to the Patient Finder app. They just need to click on the link to open Patient Finder. It provides your location and displays other key pieces of information.

# Hospital Services & Facilities

## Accommodation

Mount Hospital provides single and shared room accommodation. All rooms have ensuite facilities and each bedside console has a locked drawer for the storage of medications. Whilst we make an effort to satisfy every request for a single room, on some occasions this is not possible due to clinical necessity. If you are uncomfortable with your initial allocated accommodation, please discuss this with the Nurse Unit Manager.

Please note that should you request a private room you may incur an additional charge from your health insurance provider.

## ATM

ATM machine is available in building 146 out the front of Hudsons Coffee.

## Internet Access

Wi-Fi internet access is provided free of charge to patients. When selecting a network on your device you will need to select 'Healthscope-WiFi' and accept the Terms and Conditions of Use. This is a basic free Wi-Fi service that isn't designed for video streaming. Please note that the hospital does not provide support for end user devices that connect to this network.

## Interpreter Service

If you require an interpreter your nurse can arrange this and a fee will be incurred. An interpreter can be organised promptly, at any time. Our interpreter service is able to provide assistance in 26 languages and this also includes a telephone interpreting service.

## Laundry

Mount Hospital does not provide patient clothes washing facilities, so you will need to ask your relatives or carer to do your personal washing.

## Pastoral & Spiritual Care

Arrangements can be made with a local minister/faith representative to provide spiritual care. The after-hours manager of the hospital has a contact list for many denominations. Your ward co-ordinator can help with this request.

## Telephone Service

The hospital provides telephones at each bedside for your convenience. Should you wish your family and friends to have direct access to your telephone, you may enquire either through the ward staff or the receptionist as to your direct telephone number.

To make outgoing calls, press '0' for an external line and dial the number you require. There is no charge for local calls.

## Television

Each patient room is fitted with a television, which is controlled through your patient call bell. You will find all the regular Western Australian TV stations available for your viewing pleasure. Chanel '250 patient info' provides information on the hospital and important information about your stay with us in an audio-visual format. If you have any difficulties with the television, please do not hesitate to bring it to the attention of any staff member who will be only too happy to assist.

## Newspapers

Daily newspapers are available to order by dialing reception (press 8) before 3.00pm. Your health fund may cover this cost, otherwise payment will be requested.

## Our Team

During your stay you will be cared for by highly qualified doctors, nurses and allied health professionals. You will also encounter a variety of support staff such as receptionists, ward clerks, hotel services and volunteers.

### Allied Health

Mount Hospital has a specialised and highly skilled team of allied health professionals, including physiotherapists, occupational therapists, speech pathologists and dieticians.

Physiotherapy may be required before and after your operation, or during your stay to aid in your recovery. Simply ask your doctor or nurse for a referral. Please telephone 9481 1660 or extension 2913 to arrange an appointment. Physiotherapy services attract a fee, which may be claimed from the ancillary service cover of your private health fund.

Occupational therapy services are provided by Mount Hospital. Please consult your doctor/nurse to discuss the assistance you need and to arrange a referral. Services include functional assessment, rehabilitation, equipment prescription and discharge planning. Occupational therapy services may attract a fee, which may be claimed from the ancillary services cover of your private health fund.

Dietetic services are available during your admission or after discharge. A referral by your doctor is essential. A fee may be incurred, which can be partially claimed from the ancillary cover of your private health fund. Nursing staff will be able to contact the dietitian on your behalf.

Speech Pathology services for communication and/or swallowing difficulties are available during your admission or after discharge. A fee will be incurred, which can be partially claimed from the ancillary cover of your private health fund. A doctor's referral is essential. Speech pathology services are provided on a part-time basis and nursing staff will be able to contact the speech pathologist on your behalf.

### Catering Service

Our catering staff take great pride in the meals provided for you. All food is cooked onsite daily and a choice is available for each meal. A menu for the following day is provided on your lunch tray and collected at the end of the meal.

If, due to your medical condition, you have certain dietary requirements, the nursing staff or dietician can advise you on appropriate choices.

Meals are served at the following approximate times:

Breakfast	7.30am–08.30am
Morning Tea	10.00am
Lunch	12.00noon–1.00pm
Afternoon Tea	2.30pm
Dinner	5.00pm–6.00pm
Supper	8.00pm

### Home Care Services

Information on general home care services and referrals can also be provided by our nursing staff.

## **Pharmacy Services**

Our pharmacy services are provided by the HPS Pharmacies. The hospital fee does not cover some of the pharmaceutical items that are prescribed by your doctor or anaesthetist.

These pharmaceuticals will appear on your hospital account. A short description of the item may also appear on your account. These charges include items such as intravenous fluids and drugs administered by your anaesthetist in the operating suite. Your health fund may cover some portion of the private pharmacy charge but it is not legally authorised to cover PBS items.

Your balance is required to be paid on discharge. Your account will be prepared by the Mount Hospital reception staff, who will estimate any rebate your health fund will pay for pharmaceuticals. Your account is then submitted to your health fund or insurance company by the hospital. Whilst every effort is made to provide an accurate estimate of the rebate your health fund or insurance company will pay, it is possible there will be an outstanding amount once the claim has been processed.

This can occur due to the varying levels of cover and exclusions and excesses that may apply to your cover. An account for the outstanding amount will be forwarded to you by the hospital, if applicable.

If you hold a social security/pension card or Safety Net card, it is important that you provide hospital reception staff and the pharmacy with your appropriate number so that all items are charged at the correct rate.

Please contact the Mount Hospital Pharmacy if you have any specific queries with respect to your pharmacy charges.

If you require a detailed copy of pharmaceutical items supplied during your admission, please call in or contact the pharmacy on (08) 9481 1880. The pharmacy is located on the ground floor of the Mount Medical Centre, 140 Mounts Bay Road.

## **Radiology**

Perth Radiological Clinic provides the Mount Hospital's radiological services. They are located on the second floor of the medical centre, 140 Mounts Bay Road.

The following services are provided: general X-ray, CT, MRI, ultrasound, mammography and any diagnostic procedural work. X-rays taken during your stay in the hospital belong to you. If you have not received these upon discharge, please ensure they are collected from Perth Radiological Clinic prior to leaving the hospital.

## **Stomal Therapy/Wound Care Consultant**

Mount Hospital has an in-house stomal therapist/wound care consultant who can be contacted by the nursing staff at any time for advice on any wound or stoma problem.

## **Volunteers – Friends of Mount Hospital**

Friends of Mount Hospital Inc. was established in March 2005. This is a small group of dedicated volunteers who freely give their time to provide services to complement the work of hospital employees. The friends assist in the oncology clinic and other ward areas, as well as taking a trolley with books and magazines around to all patients throughout the week. If you are interested in joining the Friends of the Mount Hospital, please contact the volunteer co-ordinator on 9327 1100.

# Important Information

## Clinical Bedside Handover

The implementation of bedside handover is a part of the eight (8) National Safety and Quality in Health Service (NSQHS) Standards, which measure overall performance of hospitals. Bedside handover will improve communication between patients and staff, ensure patients/consumer participation and allow the patient to be at the centre of all discussion surrounding their care.

Bedside clinical handover is the sharing of clinical information about you, between your treating nurses and you. Performing handover at your bedside allows the nurses to be introduced to you and allows for exchange of information that ensures continuity in your care. The nurses will review your medical charts together and check any infusions or drains that you may have. You will be able to comment on the information discussed.

We aim to perform handover during non-visiting hours. When this is not possible your visitors will be asked to leave the room whilst personal information about you is discussed. Parents, carers and family members can stay during your handover.

## Food & Drink

Please inform the Nurse in Charge of any food or drink that is brought in to hospital for you.

Unless special permission is given on medical grounds, no alcohol may be brought into the hospital. Visitors are particularly requested to observe this rule as its breach could have very harmful effects on patients.

## Infection Control

Mount hospital has an effective infection control program to ensure patients and staff are protected from acquiring infections.

It is important to note that, despite the implementation of excellent infection control measures, the risk of developing an infection related to your hospital stay cannot be completely removed.

The single most effective means of reducing the risk of transmission of microorganisms from person to person is routine hand washing. 80% of all infections are spread through contact. It is the responsibility of all staff and visitors to the hospital to ensure good hand washing practices. Alcohol-based hand rubs are available at the entry to each ward and in each patient bedroom. It is important to perform hand hygiene as you enter and leave the hospital.

Your healthcare worker should always perform hand hygiene in front of you. If you do not see them and are worried, please feel free to remind them.

## Medical Emergency Team (MET)

The medical emergency response system at Mount Hospital is called MET, short for medical emergency team. MET is a team of doctors and nurses who will respond immediately to a call for urgent medical help.

## Making a Met Call for Urgent Medical Help

It is important that parents, family and carers know what a MET is and how to make a MET call if you are worried that your loved one is suddenly becoming more unwell. As a valued partner in the care of your child or family member, your concerns are important to us.

You can make a MET call at any time of the day or night. For example, breathing harder and faster, sleepier than usual.

These changes may be an early warning signs to becoming unwell.

Where possible, raise your concerns with staff on the ward before making a MET call. If your loved one requires urgent medical help there are two ways you can make a MET Call.

1. Ask a staff member to make a MET call. You can do this by alerting a staff member directly, or pressing the nurse call button or emergency button located in the room.
2. Dial '50' from any telephone at Mount Hospital. Speak to the operator. Tell them where you are in the hospital (for example, the ward and the room number).

The hospital co-ordinator will come quickly to assess, treat and plan for further care of the patient.

### **Medications**

All medications (including non-prescription drugs) should be given to the nurse on admission, who will discuss the process of self-administration and storage of medications while in hospital.

### **Money & Valuables**

Please do not bring large sums of money or items of value to hospital. The hospital does not take any responsibility for any loss incurred should you bring valuables with you. If it is unavoidable, we do provide a service whereby they can be locked in safe custody. Arrangements to withdraw valuables should be made during office hours (9.00am–4.30pm Monday to Friday). To take advantage of this service, please speak to the nursing staff on your ward.

### **Patient Identification**

A wristband with your name, date of birth, unique number and gender will be placed on your wrist during admission. If you are having an invasive procedure then two bands will be applied.

It is waterproof and will only be replaced if the information becomes unreadable, or you require medical intervention on the area the wrist band is attached to.

### **Why do we check your ID band?**

Before you receive care or undergo a procedure, staff will routinely ask you to confirm your identity by stating your full name and date of birth. We haven't forgotten who you are. This is part of our risk management process.

We understand this might be frustrating at times and seem strange or impersonal, but it is an important way of ensuring the safety and quality of your care.

### **Alerts & Allergies**

Your identification band will be red if you have reported or documented allergies and alerts, i.e. medicine, food, contrasts. Please let your nurse know if you have any allergies of any kind.

### **Patient Rights & Responsibilities**

Mount hospital is committed to providing you with the very best care and providing you with health information that is easy to understand.

A rights & responsibilities brochure is available on admission and also available on our website. They are consistent with the Australian Charter of Healthcare Rights.

The rights of patients relate to access, safety, respect, communication, participation, privacy and consent. If you have any questions about your rights and responsibilities, please see your nurse.

## Pressure Injury Prevention

### What is a pressure injury?

A pressure injury is also known as a bedsore or a decubitus ulcer. A pressure injury is a lesion caused by unrelieved pressure. Damage may extend from the skin to the underlying muscle and bone.

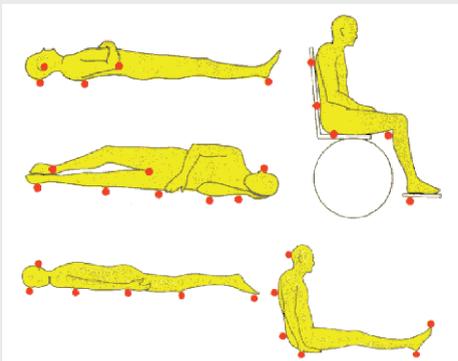

A pressure injury risk assessment is completed for all patients on admission to our facility.

### Am I at risk of developing a pressure injury?

You may be at risk of developing a pressure injury if you are:

- Unable to move or reposition yourself every 20 or 30 minutes due to illness, injury or a long-term medical condition.
- Exposed to long periods of unrelieved pressure during an operation.
- Sitting on a commode chair for longer than 20 minutes, sitting for long periods in chairs, wheelchairs or beds, especially if you are elderly.

### Where do they occur?

Pressure injuries can occur on most parts of your body. The most common sites for pressure injuries are over the tail bone (lower back), the heels, hips and the buttocks. Common sites are indicated by red dots in the pictures.

### What can I do to prevent pressure injuries?

You should make sure you reposition yourself at least every 20 minutes if you are not on a support surface or on specialised equipment.

If you cannot move then you should be frequently repositioned to relieve pressure to parts of your body and you should be nursed on support surfaces and specialised equipment. The use of specialised equipment can also promote healing and prevent further damage to an existing pressure injury.

### Should I check my skin regularly?

You or your carer should check your skin at least once a day and identify and report to nursing staff areas that may be exposed to excessive pressure caused by tubes, drains, cords, creased bed linen or clothes, foreign objects left in the bed, and by damaged commode/seating covers.

These types of pressures can cause superficial damage to your skin that should easily heal once the cause of the pressure is removed or rectified.

(Reference: NSW Health, Hospital Information Pressure Injury).

### Purposeful Hourly Rounding

Rounding has resulted in increased patient safety and satisfaction in all clinical areas. It drives clinical staff to the bedside so that they can be proactive with assistance for you. Rounding can bring improved patient experiences due to feeling less isolated with regular visits.

Rounding should occur, at a minimum, hourly for every patient in medical, surgical and rehabilitation wards. This is patient-focused and addresses the following: pain, bathroom assistance, comfort and positioning in bed, that patients' needs are in reaching distance, that staff are available via the call bell, and that a staff member will be returning each hour to check in.

## Request for Your Medical Record

Requests for access to your health records held by Mount Hospital can be made through our Health Records Department. *The Privacy Act* allows you to request your medical records. If you would like to request a copy of your medical record, please ask the Nurse Unit Manager of your ward for further details.

## Smoking

All Mount Hospital premises, including patient balconies and campus grounds, are completely smoke free. The hospital promotes a non-smoking environment, and your cooperation in observing this is appreciated.

## Safety – Emergency Evacuation

Your safety is important to us. Although extremely unlikely, in the event of a fire or other emergency, evacuation of a ward or portion of a ward could be necessary. DO NOT USE LIFTS. All that is required of patients is to remain calm, stay within the ward until the Nurse in Charge guides patients to a safe area or fire escape stairs.

## Useful Hints to Reduce a Fall

Whilst in hospital your nurse will assess you to identify whether you are at an increased risk of falls. If you are, your nurse will implement extra measures to try to reduce the chance of you having a fall.

There are ways in which you can help to prevent falls:

- Take time to familiarise yourself with the nurse call bell, light switches and your room.
- Ask visitors to return furniture to a safe place before leaving.
- Use the rails to steady yourself in the bathroom and hallways.
- Walk safely within your limitations.
- If you feel dizzy and this is a new symptom or is worse than usual, tell your nurse or doctor.

If you feel dizzy while sitting, remain sitting or lie down. If you become dizzy while standing or walking, sit down as soon as possible.

- If you're moving around, take your time.
- It may help to move slowly from one position to another.
- ALWAYS ask for help if you need it to walk safely.

## Discharge Information

It is important to us that your discharge from Mount Hospital is as smooth as possible. The following information has been provided to assist you in planning your discharge with the nurse caring for you.

Questions you may wish to ask when planning your discharge with your nurse:

- What is my expected discharge date and time?
- When can I make arrangements for collection/discharge?
- What medications will I be taking home?
- Do I need a medication list?
- How do I care for my wound?
- What do I do if the dressing gets wet?
- Do I need to obtain extra dressings?
- Do I need to make an appointment with my specialist?
- When do I make an appointment to see the GP?
- Do I need to take my nursing discharge summary with me?
- Do I need any equipment to use at home?

### Discharge Time

To help us to prepare rooms to the same standard that you enjoyed upon arrival, we kindly ask that you depart from your room by 10.00am on your day of discharge. If your transport home has not arrived by 10.00am, please discuss this with your nurse.

If you require assistance with luggage or transferring to reception, please do not hesitate to ask your nurse or ward clerk. Should you have any queries or concerns after you have been discharged, you are welcome to contact us on (08) 9327 1100 and ask to be transferred to the ward you were on.

### Account Payment

Payment of the patient balance is required on discharge.

To save you unnecessary delays, reception will be happy to prepare your account prior to your arrival at reception. To notify accounts, call 2834 (Monday to Friday 8.00am–4.00pm) approximately thirty minutes prior to your discharge.

We accept cash, bank cheques, money orders, EFTPOS, VISA and MasterCard for any amounts payable. We do not accept Diners or AMEX.

Please note a 1% surcharge is payable on all payments processed on VISA or MasterCard.

Personal cheques and business cheques will not be accepted.

# Patient/Consumer Feedback & Participation

## Feedback

Mount Hospital is committed to providing a high standard of care and service. The hospital places a great deal of importance on patient feedback concerning their hospital stay. Feedback from our consumers helps us to improve our care and service. Please note that you will not be adversely affected in any way should you make a complaint about any aspect of your care at Mount Hospital.

As consumers, you have the right to considerate and respectful treatment by all our staff. If you are concerned about any aspect of your treatment or care at Mount Hospital, there are several ways in which you can inform us.

If you have provided your email on admission you will receive an email upon discharge. You will then be invited to complete a short survey. Your feedback will assist the hospital in prioritising areas for improvement.

You also have the option of a hand-written feedback form. We encourage you to complete the survey and return the form to our nursing staff, who will ensure it is referred to management for their attention and action. We thank you for your participation in these surveys.

If you would like to discuss your comments further, please leave your name and telephone number, and a staff member will contact you.

In addition, you may speak to a staff member at the time. They will either explain the situation more clearly to you or take lengths to solve the issue in a timely and considerate manner.

If you are not comfortable doing this, you may ask to speak to the Nurse Unit Manager or the Director of Nursing, who will be happy to hear from you and will ensure that your concerns are heard.

A further option is to call us from home, write a letter or head online to <http://www.mounthospital.com.au/contact-us> outlining your concerns. We endeavour to acknowledge all complaints within 24 hours of receiving them.

We investigate your concerns, take appropriate action, and respond to you with a formal reply within 28 days, as per Healthscope policy.

## Participation

We recognise that there are many benefits to be gained from engaging patients and carers in service planning and in developing quality and safety initiatives. Partnering with consumers in this way will help us to better meet patients' needs and preferences. We have a consumer advisory panel to partner with us in delivering our services. If you would be interested in contributing to this panel, please contact the Volunteer Co-ordinator on 9327 1100.

## Local Community Services for Your Information

The following pages contain information on a curated range of local community services chosen to help you and your visitors during and after your stay.

Though a service's feature in the publication doesn't imply an endorsement on behalf of the hospital, we want to thank these service providers for their support, without which this publication would not be possible.

Please take the time to look through their services and consider their usefulness to you.

Leaving hospital and heading home?  
Need extra support?

## High Quality, Great Tasting Meals

Choose from over 70 meal options, including salads,  
soups and desserts.

Special dietary options, including vegetarian, low salt,  
gluten-free, diabetic and pureed.

Our meals are cooked fresh in our state-of-the-art premises, then  
snap frozen to retain flavour and nutrition.

Whether you are a new parent or recovering from illness, good  
nutrition is so important to your wellbeing.

# The wonderful staff and exceptional accommodation create a real home away from home.

During these uncertain times you can be certain that at The Richardson we understand that aged care is so much more than managing everyday needs. It's about getting to know the person and family behind the name and always putting their safety and wellbeing first. Together we make the difference.

**Discover a real difference in Aged Care.**
